

Prebbleton School New Classroom Block

This multi-functional block of 8 classrooms is a combination of Titan board cladding and grooved concrete tilt slab construction over two levels. With exposed aggregate features on the ground floor and a balcony with funky punched metal balustrade designs, this truly is an enviable learning environment. Titan Façade Panel offers a bold industrial look for both light commercial and residential applications where a panelised look is desired. The board is resistant to fire, damage from moisture and rot, and provides a long lasting and robust finish.

This is the second classroom block Contract has completed for the school, the first one constructed in 2007.

Prebbleton School has been here since 1857. When it first opened it was a small rural school. In the last decade Prebbleton has grown with many new housing areas popping up and is now a thriving school of 490 students.

OVERVIEW

Address

Street: Blakes Road
Suburb: Prebbleton
City: South Canterbury

Consultants

Engineer: R D Sullivan
Architect: CR Thomas & Associates

Project Details

Value Band: \$1-5m
Size: 1099 m²
Stories: Two
Category: Commercial
Type: New Build Education
Finish Date: Jan 2014
Build Time: 10 months
